YST URL Transformer 3

YST URL Transformer

You need to translate an internal YST into the external reachable format? Then copy the internal link into here and press „Convert“

```
<html>
```

```
<input type=„text“ id=„in“> <button onclick=„myFunction()“>Convert</button>
```

```
<p id=„demo“></p>
```

```
<script> function myFunction() {
```

```
    var inURL=document.getElementById("in").value;
    var oldURL=inURL.match(/https?:\/\/\.[\w\.]+\//i);
    var olddomain=oldURL[0].match(/[\w\.]+/g);
    var newURL=inURL.replace(oldURL,"https://portal.yazaki-systems.com/");
    var lastLimiter = newURL.lastIndexOf("/");
    newURL=newURL.substr(0,lastLimiter+1) + ",DanaInfo="+ olddomain[1] + "+" +
newURL.substr(lastLimiter+1-newURL.length);
    document.getElementById("demo").innerHTML = '<a
href="' +newURL+' "'>' +newURL+' '</a>';
```

```
} </script>
```

```
</html>
```
