SQL- Tricks

Schlüssel- Fehler

<https://stackoverflow.com/questions/11879217/display-names-of-all-constraints-for-a-table-in-oracle-sql>

Error Msg = ORA-02291: Integritäts-Constraint () verletzt - übergeordneter Schlüssel nicht gefunden:

```
SELECT *
  FROM user_cons_columns
 WHERE TABLE_NAME = '<your table name>';
```

```
SELECT *
  FROM user_constraints
 WHERE TABLE_NAME = '<your table name>'
    AND constraint_name = '<your constraint name>';
```

oder auch <https://stackoverflow.com/questions/11868758/find-parent-key-in-a-constraint>

For the parent table:

```
SELECT * FROM all_constraints
       WHERE constraint_name IN (
           SELECT R_CONSTRAINT_NAME
             FROM all_constraints
            WHERE constraint_name = 'ADS_JOB_FAMILIES_F03');
```

For the parent column:

```
SELECT *
  FROM all_cons_columns
 WHERE constraint_name IN (
     SELECT constraint_name
       FROM all_constraints
      WHERE constraint_name IN (
          SELECT R_CONSTRAINT_NAME
            FROM all_constraints
           WHERE constraint_name = 'ADS_JOB_FAMILIES_F03' ));
```
