SKDS Changelog (Version 3.2 -> 3.4) 3

SKDS Changelog (Version 3.2 -> 3.4)

Revision: 109

Author: steffen

Date: 13:32:26, Freitag, 10. April 2009

Message:

feature# new menu item "Tools/Debug/No Real Modules" sets the boolean variable "NoRealModules" in the script. This flag can then be used to distinguish in the script of how to handle communication errors (because of no connected modules)

Revision: 108

Author: steffen

Date: 07:07:14, Freitag, 10. April 2009

Message:

branch - changes merged into trunk

bugfix: actual application directory was undefined. Now it's set to script directory latest at each form activation

bugfix: buffer content was nil after setbuffer(xx,0)

Revision: 107

Author: steffen

Date: 14:14:53, Samstag, 14. März 2009

Message:

version: set to 3.3.1

bugfix# correct identification of diagnostic modes at old FDS-K--Line Modules to send Tester Present

bugfix# On SKDS classic a module with the correct module id needed to be opened also on the client side to initialize the port -fixed

minor#: copyright text is now moved into central build- file

feature#(FS#99) Wibu-DLL now added to standard installation to allow instand use of usb- dongles

bugfix: buggy hyperterp interpreter failed on comment line generated by optload command for sec- codes. Workaround by changing comment text

Revision: 106

Author: steffen

Date: 11:54:58, Samstag, 28. Februar 2009

Message:

feature# SetBufferLen to modify buffer sizes as needed

Revision: 105

Author: steffen

Date: 17:18:54, Samstag, 7. Februar 2009

Message:

#bugfix: SKDS crashed after receiving remote telegram via Skype because of uninitialized buffer memory

Revision: 104

Author: steffen

Date: 18:26:59, Dienstag, 9. Dezember 2008

Message:

minor: if running from a stick, CodeMeter now terminates (means make the USB stick ready to eject) when finishing the SKDS- application
