SKDS Changelog 4.1 3

SKDS Changelog 4.1

Revision: 132

Author: steffen

Date: 11:34:19, Sonntag, 2. Mai 2010

Message:

#bugfix: SKDS is storing the last window position. But when SKDS was used last time e.g. on a second monitor, it reopens again on that position, which is somewhere outside the visible and reachable area of the default laptop screen, so it appears as if SKDS does not open any window. This is fixed now
#mirror: the process message in the Keymanager when translating files is now correctly updated during the process
#mirror: The row foldings when using the search functions don't look so ugly anymore
